

RAHUL E

Entry-Level Software Developer | Backend Developer | Java | Python | MySQL

Bengaluru, Karnataka | +91 7619533115 | rahul01032005@gmail.com

GitHub: github.com/Rahul01032005 | LinkedIn: linkedin.com/in/rahul-e-5624b5287

PROFESSIONAL SUMMARY

Entry-level Software Developer focused on backend development using Java, Python, MySQL, FastAPI, JDBC, and REST APIs. Built 3+ academic and personal projects involving CRUD workflows, database integration, API development, automation, and user-facing dashboards. Strong foundation in DSA, OOP, DBMS, and problem solving.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, PHP, JavaScript, SQL

Software Engineering: SDLC, OOP, MVC Architecture, Modular Programming, Debugging

Backend Development: FastAPI, Spring Boot, JDBC, REST APIs, CRUD Operations

Frontend: React.js, HTML5, CSS3, Streamlit

Databases: MySQL, SQL Queries, DBMS Concepts, Database Design

Developer Tools: Git, GitHub, VS Code, Postman, Excel

Core Competencies: Data Structures, Problem Solving, AWS Cloud Fundamentals, Backend Logic

RELEVANT EXPERIENCE

Software Development Project Experience | *Academic and Personal Projects* | 2024 - Present

- Delivered 3+ applications with 10+ modules across backend logic, database operations, API integration and user interfaces.
- Applied modular coding, debugging, Git/GitHub version control and documentation across Java, Python, PHP and MySQL projects.
- Implemented CRUD workflows, validation, transaction handling and structured data storage to support real project use cases.

PROJECTS

AI Self Management System | *Python, FastAPI, Streamlit, AI APIs*

- Built a FastAPI backend with REST endpoints for task creation, reminder tracking, and AI-based productivity suggestions.
- Designed modular backend routes to separate task management, activity monitoring, and AI response generation.
- Integrated AI APIs to generate personalized productivity suggestions based on user task history.
- Built a Streamlit dashboard to visualize tasks, activity logs, and productivity status.
- GitHub: github.com/Rahul01032005/AI-Self-Management-System

Fuel Station Monitoring System | *Java, JDBC, MySQL*

- Engineered a Java console application with 5 workflows: fuel stock, pricing, refills, billing and sales monitoring.
- Connected Java with MySQL through JDBC to create, update and retrieve inventory, transaction and billing records.
- Automated stock deduction after each bill and stored timestamped transactions for daily sales tracking.
- Added admin controls for price changes, quantity updates and refill management to improve operational accuracy.
- GitHub: github.com/Rahul01032005/Fuel_Station_Monitoring_System

Online Voting Portal | *PHP, MySQL, HTML, CSS*

- Developed a 3-module web portal for voter registration, vote submission and result viewing.
- Created MySQL workflows to store voter records, vote counts and result data for reliable election processing.
- Designed HTML and CSS pages for registration, voting and result screens with clear user navigation.
- Live Demo: online-voting.page.gd

EDUCATION

Master of Computer Applications (MCA) | Visvesvaraya Technological University | Expected Sept 2027

Bachelor of Computer Applications (BCA) | Mangalore University | CGPA: 9.31 | Aug 2022 - Aug 2025

Relevant Coursework: Data Structures, Object-Oriented Programming, DBMS, SQL, Operating Systems, Software Engineering

CERTIFICATIONS

- NPTEL Certification — 90% Score
- SAP Business Data Cloud — SAP
- Oracle Cloud Infrastructure Foundations Associate — Oracle
- Core Java Certification

ACHIEVEMENTS

- Scored 90% in NPTEL certification and completed multiple technical certifications in Java, data tools and business data cloud concepts.
- Completed BCA with 9.31 CGPA while building 3+ software projects using Java, Python, PHP, MySQL and web technologies.
